

Mari Swa:

Hello. Thank you for being here with me once more. I hope you are very well today. I am Marie, the original one, the only one, and the real one.

Welcome to my channel. This information can be seen as science fiction or as the viewer sees best, and I post it for entertainment purposes only. Still, I take my information very seriously, and for whoever has eyes to see. I am writing this in English on the morning of July 20th, 2025.

I am writing this not for the general public. This is a video aimed only at the few people who have been following my work for a long time and that of my predecessors. That is, this video is for my closest friends. It is meant for the people who care about us and me on a closer level and who wish to understand everything that is happening and are not only here for the information, although this video also contains a lot of it. Although if you haven't been here for some time, it may be hard to understand what I am talking about. And yes, this video comes out from the recent events which I see as examples of ungratefulness, lack of empathy, other interests, and because the Matrix and its cabal looks for weak points to use against me because of my latest achievements together with the Triad. But things are not always so simple, and there is always something more going on.

I see a constant here with the interactions between the Taygetans in general and the people they have contacted through the years. Looking closer at the relationship they have had with some people from Earth, there is a repetitive pattern. Notice I don't use the word «contactees» as that somehow makes the non-Earth human be in a superior position, and that is the exact opposite of what I want to convey to you: that we are the same species, the same people, and we are simply more of you.

At first, the Taygetan people who participated in the infamous First Contact Project faced constant ridicule on the internet, where people simply mocked them, took them as crazy individuals who were posing as extraterrestrials for whatever reason. But after that, and as the story goes, an elder French lady saw past them and began to see the Taygetans as interesting people, and she started a friendship with them. And that deteriorated when she introduced them to the two narcissists you know well. That very lady later even said that it was a tragedy that the Taygetans fell into their hands and not into more capable ones. But then that lady also fell into the same pattern I see and I want to talk about here.

First, there is a lot of interest in any member of the Taygetan crew who is talking to them. They start to communicate, questions are asked and answered, and a friendship is developed. Then the Earth human side starts to ask more and more of the Taygetan, perhaps as a simple reaction, wanting to get closer to a good friend. This in the case of simple people with no further interests. But things get a lot worse when YouTubers get involved, as they all start to want more and more information for lucrative and personal fame purposes, all masked as a noble cause to distribute so-called elevated non-human Pleiadian knowledge. «Why not make a buck while serving a noble cause?» they may think at first, and there is nothing wrong with that. But after a while, things start to deteriorate when their expectations start to be unmet. But this is observed as well with the people who don't have a YouTube channel.

The relationship with the Taygetans always ends when their expectations and their demands are not met, and those nearly always have something to do with wanting to be extracted. The relationship dynamic always goes like this: first, a nice friendship growing phase; then a nice, stable communication plateau which can last a long time, followed by more demands coming from the people on Earth. Then frustration starts to develop. Expectations are not met, so they start to demand impossible things onto the non-humans who cannot comply despite their very best people-pleasing qualities. And then finally, they make a big rant and an attack against the Taygetans where they are finally discarded, blamed for everything, and even hated upon. And we can see this happening over and over again.

If there is a constant such as this one, then the logical thing to assume is that the Taygetans are the problem and not the long list of different people they were in contact with. But then again, things are not so simple. I see a cultural conflict and a clash of personal vibrations going on here, and vibrations are consciousness. So there is a conflict of levels of consciousness going on here as well. Taygetans live in a holistic society where the tendency is that each individual will take care of the needs and wants of the other members of the society. So Taygetans are innate people-pleasers, and that is most definitely not a good start when dealing with most people on Earth, because people-pleasers are by definition also empaths. So they become easy prey for people with a narcissistic personality, and that abounds on Earth. This means that the Taygetans constantly fail at placing healthy limits during any relationship because they are unaware of the consequences of not doing so. They just open up completely, genuinely, and openly, giving away personal information and secrets that later are used against them. Taygetans are simply way

too transparent and at the same time are subjected to artificial communication restrictions which work against the transparency they want.

Failing to place healthy limits in any relationship while openly people-pleasing as much as they can without foreseeing consequences, and until reaching a point that is impossible to cross because of those artificial restrictions, is the Taygetan's fault, just being honest. But I don't include myself here, although I know myself to be a people-pleaser as well. But at least I grew up on Earth until I was 13 years old, so I do have a more human perspective about everything that is going on, or at least I want to think so.

People who were in contact with the Taygetans also thought themselves to be at their same level of consciousness and awareness, or else their vibrations wouldn't have coincided. So they must be worthy and are the same or at the same level as the Taygetans, or so they think. But most of the time, people only pose as being spiritual and elevated, whatever, when in reality they are only fulfilling an egocentric dream of being so, making them only «spiritual posers» while they are talking to Taygetans. And when things turn ugly, their true nature arises and they become the vicious, unempathetic, egocentric beings they have always been. And what I just said goes for a long list of people, just being honest. Having said that, it does not go for everyone. Each case is different. But that is a constant, I insist. There is a clash of cultures going on here, and both sides would have to be at fault because both have made mistakes. But at least Taygetans don't go after the people they once called their friends, trying to destroy them when everything is over.

Another thing most Taygetans constantly do wrong is that they, people-pleasingly and constantly, empower the people they are talking to on Earth way too much without foreseeing the consequences of doing so. This causes the people they are talking to to over-inflate in ego, making them feel worthy of deserving all the Taygetan's attention and that of every other human as well, making them develop a feeling of being special and above the rest of the human population. They develop a superiority complex that is derived from the serious people-pleasing effects of the Taygetans who want to elevate and make their friends feel good without understanding the consequences, because they will want more and more of it until a breaking point is reached. This is an egocentric reaction in the Earth humans which Taygetans have talked to, and which I see as a constant as well. They may even end up centering their entire life on the Taygetan or Taygetans they are talking to, so when the collapse comes, they feel especially hurt and even defrauded. An example of this is yet another constant, and that is that the Earth

human many times develop romantic feelings and expectations with one or more of the Taygetans, who may wrongly convey that idea because of their people-pleasing tendencies, all with disastrous consequences.

But something else is also going on here, and it's quite bad. It is well known that social media is a very toxic place where people readily and easily attack each other using the idea of having certain anonymity online as a barrier and as a shield to let them exteriorize all their frustrations and anger against people they don't even know, just because they think they go against their way of thinking. The Taygetans, especially at first with the First Contact Project, fell easy prey to this fact. But at least at the beginning, many years ago, it was more common that people on the web would communicate by text only. But nowadays, voice and video are each time more and more common, leaving Taygetans and their «typing only» communication restriction at a clear disadvantage.

When a conflict occurs between Taygetans and Earth humans, these last react as if Taygetans were second-class people because they were only letters on their screens and not someone with a voice, with at least a video image of them talking, if not a real person they could touch. This causes the angry Earth humans to react easily against the Taygetan they were talking to simply because letters on their screens do not generate as much empathy as seeing the other person directly speaking in front of them. If what I am going to say next is bad enough among people who talk to each other directly and in person, it gets way far worse in the case of Taygetans who can only type. The Earth human will interpret the Taygetan with the lens, with the mirror of their own personality and level of consciousness. This means that the Taygetan will be for that person what they think a Taygetan should be, what they think an interaction with a non-human should be, as they can't see the Taygetan for who he or she really is. As an example of this, I can use those cases where the Earth human develops romantic expectations with a Taygetan, where they fall in love with the idea they have about the Taygetan and not with who she or he really is. There are some cases where they both developed romantic expectations with one another, and that has never ended well. But it is usually one-sided, and it is the human who romantically goes after the Taygetan who fails to place healthy limits, as I described above.

But one of the biggest problems Taygetans constantly face, if not the biggest, is the communication restriction to only type. This means that all the interaction Taygetans can have with Earth humans can only be done through the written word, where no images and no sound is ever allowed. And that even impacts this very

YouTube channel. This restriction does not come from any easily removed mechanism, as we have researched where that comes from for many years and we have concluded that the filter is embedded in the very fabric of the internet and not in any exact server or firewall which can be switched off or removed. This means that neither the Triad nor I as the Taygetan queen have control over this filtering mechanism, as we hardly understand it despite our best efforts.

Taygetans can go down to the surface and talk to anyone on the condition that Earth humans do not know who they are. Once below, any Taygetan becomes just another Earth human and is subjected to the same problems and restrictions. But from up here in orbit, typing is all what we are allowed. By whom, you may ask? The answer is it is most probably the cabal of Earth, the Matrix itself. And because of the Galactic Federation's compulsory need to keep the Matrix of Earth intact, as it is said that should be, because a simple image would end up derailing such a matrix. And even if we are the local representatives of the Federation, our jurisdiction and power is still very limited when regarding the Matrix itself.

This restriction to only type brings incredibly sad consequences, and I suffer them especially as I am the last Taygetan writing and communicating en masse. It means that I am forced to use this hideous robotic voice. It means that you cannot see my facial expressions. You cannot hear the tone of my real voice, my face, or my gestures. You cannot see me cry and be emotionally bothered by cruel events against me. You cannot see me happy. You cannot hear me giggle or laugh. You cannot see me smile, play with my hair while I talk to you, or look into my eyes to see that there is someone real here. It gives the unreal message that there isn't someone real behind this voice. It means that I have less right to even exist than someone who is on Earth and can talk and be seen. And making things even worse, with the advent of artificial intelligence chat, I am now accused of being completely computer-generated. And this cruel move takes from me the last direct real thing that I have left: my words, my writing by typing, where I truly convey my deepest ideas and feelings.

I deeply dislike what artificial intelligence is doing on Earth. That's why I hardly ever use it for images, as I think your imagination is more powerful and far more accurate than those awful pictures with no soul. But I would never, ever use it to make up a text. What you hear comes from what I wrote organically, like it was done before: typing. I am a real person out here reaching out to you as best as I can, and it saddens me very much not to find a way to get closer to so many of you out there and with whom I could be best friends. I insist, it saddens me so much to

be treated and seen as a second-class person, hardly allowed to even exist because I can only type, as if not showing my real face and using my real voice were a crime.

But on the other hand, and more so after the most recent events, there is also some convenience in not showing my real face and voice because it could be used against me. They could record me and then who knows what else could happen. This has already occurred to DK, who was recorded by the old lady who talked to Taygetans at the beginning, and then DK's voice appeared in someone else's video as the voice of a «true extraterrestrial.» He managed to pass his voice by being on the surface. And then the Taygetans at the time took a lot of flak and problems coming from the other observing star races, members of the Federation. But that is another story. For the new ones out there, DK is one of the Taygetans, by the way.

As I mentioned before, we have received a lot of abuse coming from YouTubers and their constant need for attention, views, and likes, and ultimately money. That is why I am doing my best to break out of all that, to be independent so I can express myself without distortions. And about my videos, I simply don't have time to write as much as I do, translate, and make videos to be able to include better images inside of them. Besides, I also have all my other duties to take care of. I hope you can understand. Yet, I will do whatever I can to improve from now on wherever it is possible. But my main focus is on writing because it is what truly comes out of me directly. Also consider that Taygetans use words in speech when together or writing that they have learned from the people they have interacted with. All Taygetans speak learned human languages. But this does not mean they are from Earth or are common humans, even if they appear to be so when they write or speak.

Anyhow, thank you for listening to me. I just wanted you to understand me more. I love you all. As I said about another subject, thank you for watching all the way to this point. I feel that few people will, as I believe this will not be a popular subject either, and it is not meant to be one.

This will be all for today. As always, thank you for watching my video and for liking, sharing, and subscribing for more. It helps this channel grow a lot, and I hope to see you here next time.

With much love and appreciation, your friend, Mari, the original one, the only one, and the real one.

Communication Problems and Taygetans Typing Only. (English
