

Mari Swa:

Hello my friends.

We don't celebrate the New Year here, but we know that all of you do, and for this reason, I feel that this short video is necessary to wish everyone a very Happy New Year. We hope this new year finds you all united.

Dear starseeds, remember that all of you, each one of you, are powerful. You all have everything you need to manifest the best line of reality possible. Be the best version of yourself. Be those positive, high-frequency beings that we all know you already are. We love you all. Enjoy these festivities. We will be here and we will continue here accompanying you on your path of expansion.

On the 1st of January, I will return with a new topic in English and the next day in Spanish, as always. Among the new subjects are a new interview with Arie the Urmah tiger, and videos about what is happening with the Ethortans audit in the local Galactic Federation, and more about the law of attraction and manifestation, as well as more paranormal topics among many others.

Kisses and hugs to everybody with lots of love from the entire Toleka team, and especially from me, your friend

Mari Swaruu
