

Mari Swa:

Hello, thank you for stopping by. My name is Mari, and this is my YouTube channel. What I share here can be seen as science fiction or however the viewer decides to see my content, but I take it very seriously because there is a lot more behind it than what first meets the eye.

I was not born on Earth. However, my corresponding birthday has been calculated to be on March 8th, 2008, making me 17 years old at the time I am writing these words. I was born on a Taygetan starship in deep space, and then I was taken to live on planet Temmer in the Pleiades star system before moving to Earth with my mother when I was very young. To this date, I'm not exactly sure how old I was when that happened.

I lived on Earth as any normal human girl does, and I went to a government school as anyone else, where I both excelled in my class subjects and I also got into trouble a lot with the teachers and principal because I like to question everything I was being taught. And I did not like what I noticed there, even at a very young age: that the entire schooling system is designed to condition children to be obedient and not think on their own. Furthermore, I also noticed that much, if not all, of the information that was compulsorily given to the children was inaccurate, if not completely false. And when I exposed the inaccuracy with proof and with alternative views on the same subject, I was classified as a troublemaker and sent to the principal. I excelled in dancing and sports, and I lived a happy life full of friends my age on the surface of planet Earth until I was 13 years old when I touched some buttons and controls I shouldn't have in my mother's hidden starship, took off on my own, and got lost in time and space.

I was found by a Taygetan female pilot known as Athena, or Tina for short, and she brought me here to this timeline we are all in, where I have been ever since. Since then, I have slowly made a place for myself in the Taygetan society, and with the help of a few of my good friends I found here when I arrived, all while mostly living on several large Taygetan starships orbiting planet Earth.

I started this YouTube channel because I have always felt the need to share my life and what I see from here and how all things are understood differently. And also because having lived on Earth for so long, I started to have serious health problems because fully Taygetan food did not suit me right. So I had to find a way to finance my subsistence so I could get food and whatever else I needed directly from Earth

because, logically, full Taygetans don't use money. And that is the simple reason why this YouTube channel is monetized, but a lot more depends on it now, as I will describe further on.

I love writing, getting into a flow state while I organize my thoughts and ideas as I go typing along. But as I have imposed upon myself to publish one video a day and in two languages, English and Spanish, it is impossible for me to create elaborate videos with good visual effects because I simply do not have the time to do so, as I mostly work alone and I have other very important chores and obligations I must tend to. I am also restricted to not using my real voice, at least for now, as supposedly who knows what other sounds could filter down to Earth. And one of the rules anyone from outside of Earth must follow while observing the planet is not to disturb its culture, belief systems, and concept of reality. The reason why Earth's culture must not be disturbed is very complicated and extensive, and it is contained in my videos. Sharing that subject is one of the most important parts of my work here.

Humans on Earth are made to think that they only exist on planet Earth when there are at least 400,000 other human cultures scattered in this galactic quadrant. And that is a lot of humans. With this YouTube channel, I am a bridge between all that is happening outside planet Earth and its society on the surface. As a friend and supporter once said, «I walk between two worlds, two worlds that are not supposed to mingle, two worlds that must be kept apart, where the one on Earth should not find out that it is not alone in the universe.»

In this YouTube channel, I share with you my everyday life and what is happening around me, and it is not always pretty. I share what I directly live and what I see from here, but I also write about any other subject that comes to my mind and that I feel may be relevant or may be useful for my viewers. I don't claim to hold all the answers. All I can do is share with you a different perspective about the universe: how it is inhabited and by whom, the difficult relationship between star races and the politics involved between them, and how all that affects planet Earth and its artificially isolated culture. Being a child of two worlds, I hold a very different view of reality and about the causes for just about everything. Therefore, I know that what I say is most of the time highly controversial, but that is exactly as it should be, as seeing things from another perspective. My opinions and my information have to differ from the officially accepted reality on Earth, both about how its very society and culture work and are structured, and even more so with how cosmology is structured, as well as the complex relationship between so-called extraterrestrials

which most of the time are not even accepted to exist, much less as I see them while being technically not human myself. Notorious experts in the UFO field and extraterrestrials from Earth will never take me seriously. However, I don't care, as I know it is not in their capacity. Yet, I know that much of my information interests them and in some cases even disturbs or bothers them, as it may conflict with their interests or it may explain missing parts or expand on the conclusions they arrived at by other means. I have no intention to bother anyone, and all I wish is to be left alone to give my information to whoever may find it useful, because I have a lot to share.

I am not the first Taygetan to share information on YouTube. However, I am the only one who has managed to do so in an independent way, with no third parties distorting the information with unfortunate end results. What you hear from me here on this YouTube channel comes directly from my texts with no censorship other than what the Prime Directive of the Galactic Federation and its rules, as well as the regulations of this YouTube platform, permit me to share. I write my texts with a keyboard with no hideous AI ever. And you can see this because I have a very unique way of expressing myself and because I make the same kind of mistakes. Although I am a person and I evolve, what I write comes out of my head, and I type it with a keyboard. However, I sometimes use some AI images to illustrate my videos, but they are only ornaments and only sometimes. I use other photographs, images, or schematics to make myself clearer or to exemplify something in particular. What I say in my videos is what is important, and the inner videos and images are not that relevant in general. I may even place a single animated visual or an image as an ornament during an entire video so the viewer can place all of his or her attention on what I am saying without being distracted by mostly irrelevant ornamented images. I know my videos in general are quite simple inside, but what I say is what matters to me here, and whenever it is possible, I will look to improve in any possible aspect.

I am a member of the same group of Taygetans who have been sharing their information through third parties, although not anymore. But I am not Anéeka, I am not Swaruu, and neither am I Athena nor Yazhi. And even when I respect their information, I may not agree with all of it. I am Mari, and I do not accept taking responsibility for actions, right or wrongdoings, and problems that they may have caused in the past through their third parties. I am not associated with anyone. I choose my own friends, and I walk my own path, and I am the last Taygetan left who is writing for the human public. So all new information can only come from me.

I am the last one standing.

And as the last thing I must mention, because of complicated twists of fate I explained in detail in former videos, and as it all progressed, I am now the Taygetan queen, the leader of its society and culture. So everything you hear from me is coming from the head of the Taygetan society. Contrary to what happens on Earth, in advanced stellar cultures, a king or a queen serves the people and is expected to be an example for all to follow, and it is a huge and heavy responsibility. So please never put me in the same bag as those on Earth.

I have an alternative YouTube channel called «Swaruu Official» with two «f's,» while this one has only one «f» as it is spelled in Spanish. Yet I have it as a reserve, and I seldom upload videos there, and only to keep it alive, as I have no time to split my information into two channels, one in English and the other in Spanish, and because it is not convenient right now for other reasons. Please always have in mind that no member of my group, no Taygetan including myself, is on any other social media platform. We are not on X, WhatsApp, Telegram, Facebook, or anywhere else. So if you find any accounts in our name, they are false. I only have this YouTube channel and the one I have as a reserve. We are not on any other social media platform. If you wish to support my work, there are two donation links on my channel front page and in the description of my videos. Never donate with any other link, as it is false. However, there is an older PayPal link out there that is not published yet; it is still correct, but only my oldest supporters use it. I never ask for money either. What you give is purely voluntary, and I use it to get human food for my table and a few other necessary things. But the most important part of your donations are used to finance Taygetan movements of personnel who are working on the surface of the planet on several very important ventures for the benefit of humanity, including rescue operations and other projects against the planet's evil controllers. In other words, what I don't use, I give back to humanity at large. And I am deeply thankful to those who support me and us in every way.

This will be all for today. As always, thank you for watching my video and for liking, sharing, and subscribing for more. It helps this channel grow a lot.

And I hope to see you here next time. With much love and appreciation, your friend,
Mari.
