

Mari Swa:

Hello. Thank you for being here with me once more. I hope you are very well today. This is Mari with another edition of space news.

Welcome to my channel. This information can be seen as science fiction or as the viewer sees best, and I post it for entertainment purposes only. Still, I take my information very seriously, and for whoever has eyes to see. I am writing this on the morning of September 10th, 2025.

In today's first piece of news, I must talk about 3i-ATLAS again as it is gaining even more attention from the mainstream media. All you need to do is search YouTube and you will find innumerable videos about it, starting with scientific ones and going all the way to people who claim it is the, quote, «aliens from Lyra coming to finally save humanity.» I find it interesting that whoever said that 3i-ATLAS is the aliens said they are from Lyra, as I relate it to Lyrans in general as a species, and therefore those who would be most interested in helping humanity, ergo, the Triad, if you know what I mean, including the Urmah, because although they are felines, they are also from Lyra.

Strictly speaking, from the point of view of us, the Taygetans, and of the Triad as well, the concept of 3i-ATLAS rattling all over the media is a problem because it does not relate or correspond to anything we can directly see from up here. And as you would expect, if someone knew every stellar object near Earth, every rock, and every pebble, it would be us. Furthermore, it's not like we don't see 3i-ATLAS from here. It's more like we can see several hundred stellar objects, each of which could be taken as 3i-ATLAS, as most of them fulfill the media's alleged specifications. So, which one are they referring to? This leads us to conclude that what you hear in the media is all made up.

Even more so because there is a hologram-based etheric barrier some people call «the dome» and others «the Van Allen belts» which generate an illusory, false, and edited image of space as seen from the surface of Earth. What I just said is very «out there» for most people. Still, it is something we can fully corroborate as it is one of the primordial mechanisms by which Earth and its Matrix are being isolated and ultimately controlled. All this raises the question of who is managing the hologram barrier because it is certainly not us, and we are the Galactic Federation local authorities. This leads us to conclude that it is being controlled by entities, people who are inside Earth and not by any external force allegedly on Saturn or on

the Andromedan Viera biosphere ship, as was previously suspected and we have now found to be false.

The moon has also been pointed out as the cause of the hologram. After all, it is the place that harbors the generators used to move or transform the planet's natural magnetosphere belts, which we call the Van Allen belts, to a more destructive frequency. Therefore, it is used as a containment barrier. I know many of you have asked me for an update on the Moon and what is going on there, and I will comply with a dedicated video as soon as possible.

Coming back to 3i-ATLAS, I know that my opinion about it is completely different from just about every other person transmitting anything about it, as even conspiracy theorists and fanatics of extraterrestrials use it as some kind of validation for their mostly unfounded theories. And so could I, but it simply does not fit into our cosmology, and it certainly does not concur with the data our senses give us, as there are nearly 300 objects which more or less fit the criteria to be 3i-ATLAS. All this leads us to suspect something more sinister about it, and what is sinister is not coming from above. It is what I may mean. And again, this is an educated guess or speculation, but it certainly does look like the beginning of the staging for a false alien invasion, just as it is well known they have planned since a long time ago. And it also goes hand-in-hand with the progression of everything that has to do with disclosure in the media and from puppet politicians.

It is simply unreal to us that science on Earth may be focusing on only one of several hundreds of 3i-ATLAS-like objects while ignoring nearly 900 parked starships all larger than a kilometer parked right outside Earth. But that is the current situation. All those 3i-ATLAS objects I am talking about are comets and icy asteroids, some of which do come from outside the solar system, are part of the natural stellar object ecosystem, and are mostly harmless. Some are also remnants of the destroyed Tiamat planet. What also worries me is that we may soon have many of our questions answered as 3i-ATLAS may end up being visible from Earth, perhaps even with the naked eye. Yet from up here, we may still not see it, which for us would be a clear indication that it is only an elaborate hologram to hoax and control the people of Earth. After all, Project Blue Beam and its capabilities don't stop where the Earth's atmosphere ends, as it also appears to function in space above Earth.

And as the technical aspects of that project were explained to me by my Taygetan engineers, it may be nothing other than the same lunar dome hologram being

manipulated and programmed to show anything those who control it want. And I insist that we are no longer convinced the control of the Matrix is on Saturn, as so many people claim, as it is far more logical that it is all being controlled from Earth, most probably from somewhere in Antarctica, even though we don't know exactly where there. Leaving Saturn as the astral side control hub for Earth, as the Urmah have stated, yet they don't necessarily relate Saturn to a location, as those concepts are not so valid from the side of the astral.

Moving to something else, it looks like the media in Mexico is also starting to predict that there may be significant earthquakes now in September. I find that interesting, but we have no new data about this. What I said before still applies, and we still must stress that they are artificially triggered and that all the people on the coastline of Latin America should be on the watch, especially those in Mexico.

I have also been asked about what we think of Dyson spheres, which are supposedly super-large structures designed to capture the energy of a star. What I have to say about all of those is that we as a fully interstellar civilization, as well as any other, do not recognize the existence or the necessity to develop such things. There is no need to capture or harvest the energy of a star because if any civilization is capable of building such large things, then they would have also discovered the secrets of zero-point power, which renders capturing energy from a star simply unnecessary. Everyone in space uses zero-point energy. What scientists from Earth are most probably seeing, and this is also a hard stretch because of the hologram that covers the planet as I just described while talking about 3i-ATLAS, is just a bunch of rocks and asteroids closely orbiting a stellar object such as a sun. Such rocks would follow a more or less toroidal energy pattern as caused by the magnetosphere of the sun in question because objects with mass in a free-floating environment will tend to clump together following the pattern of the energy they are in. We can see this same effect even inside a medical pod, where the mother cells will also cluster together following the dominant energy pattern, in this case of the high-resolution hologram of the body part to be restored. Dyson spheres to me are just another Earth science theory that simply does not hold any water.

I've saved the best for last. I have great news for you. Thanks to Nai'shara's great efforts and courage and thanks to all of your requests to YouTube to help us recover monetization for this channel, I'm proud to report that we've done it. Swaruu Official channel has recovered monetization. Last Monday, for 4 hours on end, Nai'shara personally took charge of achieving this, providing all the legal and official information directly to YouTube, all from the surface of Earth, as it wouldn't be

possible from up here, proving with this that she's a real person with a Mexican terrestrial identity, which by the way begins with the letter A. She was able to legally prove that there isn't someone from another country supposedly using this channel. And for this same reason, we're now also authorized to restart the process for monetizing the other Swaruu Official channel with 2 F's, the one only in English. For this reason, I will once again load all the new videos in the original Swaruu Official channel, the one with one F, as I am attempting to more or less go back to how things were before.

I don't like the idea of abandoning the English channel, so I will be uploading past videos only in English there, as was my intention from the beginning, but which I had stopped doing. This more than anything so that if any inconvenience with YouTube occurs again, we have an access route for all of you that is working in the eyes of YouTube. And incidentally, it can serve as a reminder for all English speakers of past material, since I don't see it convenient to continue with the so-called «Wednesday videos» because they are too time-consuming, because YouTube may not agree with them, and because I decided to focus on a single channel again to maximize my time resources and because the monetization of my main channel has returned. Currently, due to health reasons and high stress levels, I need to slow down a bit with the videos, aiming for at least two subjects in each language, including a space news video and another subject each week. However, this is a minimum, and I will upload more per week if I can write more. I apologize for so many changes; I hope you don't get dizzy, but they were necessary in each given circumstance.

Back to the main topic. Not only has Nai'shara bravely stepped up to help me with the YouTube situation, but DK has too. Neither Nai'shara nor DK are human. They are two of the very few full Taygetans on these starships that have managed to get a human identity card to help us all achieve any official task that has anything to do with the Matrix on Earth. Needless to say, this places them at great risk. In the interest of transparency, we even have a surprise for all of you. Now when you make one of your kind donations on Mercado Pago, the name Rodrigo, who is DK's earthly identity, or Dhor Kaal'el, will appear in your Mercado Pago confirmation email.

DK also has a huge surprise for all of you. Please watch your screens and raise your volume.

«Hello friends, I am DK, a member of the original crew of starship Toleka. Today is

September 11th, 2025, and I'm here on Earth on a supply mission. While I'm here, I'd like to take this opportunity to greet you all and to support the publication of the 100th space news video of our Queen Mari. I want to thank everyone for the great support and trust you've shown towards her and also towards all of us. The closeness and affection you've shown over the past few weeks has been very, very important. I'm speaking for those who cannot speak at the moment, like Mari. But please know that we are, as always, close to you, and we are the same people we've always been, and nothing has changed up here. Thank you all and a big hug. DK out.»

I hope you enjoyed this surprise celebrating 100 space news. Just know that it took a lot of courage on DK's part. This is the first time he has ever sent a message like that, because we can notice that he wrote a text to remind him what to say. Thank you, DK, for putting yourself out there and taking such a risk. It means a lot to me.

At this point, I can only thank all of you, my dear friends, who listen to my videos, who recognize me in every word I write, who manage to see me despite the dark, thick fog of the Matrix. Thank you for all the support and love you have given me and continue to give me every day and at all times. I see this as an achievement for all of us together, for you and for us.

Before I go, I would like to send a special greeting and a thank you to Jichu Lion, Jhacks, and Richard Vasquez for their beautiful, supportive videos. Congratulations and thanks to JF for his analysis and opinion blog. Thank you to StarSeed who took the time, effort, and dedication to create a page with transcripts of my videos.

This will be all for today. As always, thank you for watching my video and for liking, sharing, and subscribing for more. And I hope to see you here next time.

With much love and appreciation, your friend, Mari.
