

Mari Swa:

Hello again, thank you for being here with me once more. I hope you are very well today. I am Mari.

Hello. Welcome to my channel. This information can be seen as science fiction or as the viewer sees best and I post it for entertainment purposes only. Still, I take my information very seriously and for whoever has eyes to see.

I am writing this on the morning of October 11th, 2024. News about the Alcyone Council treaty. As I have been a little unwell these past days, the Urmah King Ruhr talked to the ambassador from Sirius A, which we call Sirius One, and explained the nature and the reasons why we organized the Alcyone Council full cooperation treaty for protection against any potential threat and also to incite trade and barter among its members, aiming to lessen or even to remove our dependence on official Galactic Federation members and their heavily regulated trade and barter agreements.

The main potential threat all of us suspect is that the high levels of the Galactic Federation may have been taken over by regressive star races, mostly from the general area of Orion. The problem with this is that several star races close to Earth and who cooperate with the Galactic Federation fully and blindly, as well as some others who still haven't opened their eyes yet, have stated that all this is nothing more than a bunch of nonsensical conspiracy theories as, in their opinion, a Galactic Federation high level infiltration would be impossible. I'd rather not mention the names of those races just in case they may eventually wake up and change their mind about what we at the Alcyone Council believe.

As they have stated, those races believe the Galactic Federation is too big and powerful to have fallen into enemy hands. Yet, in my opinion, that is exactly why skilful enemies would choose manipulation and infiltration rather than a direct confrontation to get their hands on the Galactic Federation. It is precisely in this case that it would make more sense to slowly take control of it and gradually steer its unaware members in the direction of their regressive interests. In that way, all the might and all the power of a fleet of dreadnought battleships would be useless against them, as there wouldn't be anything to shoot at, even less so if the owners of those battleships remain ignorant about what is really going on.

Even better, the regressives can task those member races and their advanced and

powerful star fleets to work in their favour, all in the name of cooperation treaties among the unsuspecting Galactic Federation members. I would see this tactic as a brilliant and highly diabolical way to take over just about this entire galaxy.

This would also explain why the Galactic Federation is less insidious and oppressive against the Urmah's extravagant and assertive non-cooperative ways, as they know they are so powerful with their feline confederation that they must have them on their side no matter what, because in the event of an open military confrontation, the cats would be a real problem for the rest of the Galactic Federation that has been taken over. I guess I have effectively exported the conspiracy theory mindset from Earth to space.

Yet, the consequence of the Galactic Federation's lack of transparency, as well as their constant avoidance of facing what we say and proving us, space conspiracy theorists, wrong, as well as how they permissively let all those evil things happening on Earth, makes us easily conclude that what is going on inside the Federation does go along those lines.

As I said above, as I have been unwell these past few days, King Ruhr has been helping me out talking to the Syrian A representatives who exposed their interest to know more about our Alcyone Council treaties to later consider the possibility of joining. The bad news is that King Ruhr informed me that the Sirians decided not to join, as they feel all their needs are being met by the Galactic Federation and their official regulations. Therefore, the Sirians stated that if the treaty serves us, well for us, but they have decided to continue to work with and through the Galactic Federation as usual. I do not know exactly what Ruhr told them which led the Sirians to that decision. On the other hand, the good news is that the Antarian ambassador to this Galactic Federation area, Ased Nidia, or Nidia for short, has informed us all at the Alcyone Council that they have decided to join the treaty which they will sign next Sunday, October 20th 2024.

Next piece of news. All the negative events happening on Earth, and which are propitiating a large confrontation in the sort of the possibility of a new worldwide riot confrontation, also leads us to think that the Galactic Federation has been infiltrated, and since quite some time ago, as this permissiveness to war on Earth is far from being anything new. Yet, I strongly insist that although they always threaten to use nuclear toys, the end result of their utilization wouldn't be in the favour of the regressives either. Therefore, it is more of a tool to control the mass population of the planet. It is simply more fear tactics. Remember that higher above

the same group controls both sides.

However, this does not mean that there isn't much suffering going on in the affected areas of Earth, because even if life in the material realms is seen just as a play from higher existential planes, the existence down below is real and hard. Yet, I strongly believe that it is not in their best interests to use nuclear toys, as they are unnecessary. But beware that standard chemical explosives can cause a large enough explosion to be used as propaganda claiming that it was nuclear. A mushroom cloud is not synonymous with nuclear explosions, as it is only the result of hot gases crashing against a lower temperature atmospheric ceiling.

Moving on to other things. Starship Sadicleya's nearly identical sister ship, Big E, which is titanium natural colour and not white, has arrived at Earth's low orbit in her very first mission as she is brand new, just out of the shipyard. Her presence here will serve to strengthen Taygetan deterrence in this region of space and also to help remove the very wrong idea that Taygetans are not capable of having a strong and capable fleet. For now, she has stationed herself close to Sadicleya's starboard side here in low Earth orbit, where she will remain indefinitely as her official post escorting the Taygetan flagship.

There are currently no less than 14 new starships being built in Taygeta, Temmer, including a new class of dreadnought, the Aldebaran, and a new series of Hyades class light destroyers, of which, among those, the starship Cyndriel is close to completion. The new starship Cyndriel, which will be ready at the beginning of the year 2025, if not earlier, will most probably replace the beautiful but aging star ship Vigilant Eagle. Her crew will pass entirely from it to the Cyndriel, just as they are, and exactly the same way the entire crew of the starship Toleka passed on to the Sadicleya.

This video had to be cut short, but it will continue in the very next one. This will be all for today. As always, thank you for watching my video and for liking, sharing and subscribing for more, it helps this channel grow a lot, and I hope to see you here next time.

With much love and appreciation.

Your friend,

Mari Swa
