

Mari Swa:

Hello again. Thank you for being here with me once more. I hope you are all doing very well. I am Mari. This information can be seen as science fiction or however the viewer sees it best, and I post this for entertainment purposes only. But I take my information very seriously for whoever has eyes to see.

As most of you know, the deep Galactic Federation has sent a diplomatic detachment to audit and oversee what is happening on and around Earth. This detachment has arrived on the date December 31st, 2023, as was announced before. If you are new to my channel or you have missed other videos on this subject, I'd advise you to watch them as well to understand all that is going on, as you may need the full detailed context. I will provide links to those videos on the top right corner of your screen around this time and on, thank you.

This detachment consists of members of the Eorthan Tall Gray race from Orion, also known as big nose Grays, which are supposed to return to their higher Galactic Federation masters with a detailed report. Although officially they are an old and wise positive race, the Eorthan Tall Gray race is known to be cold, logical, and not empathetic, which makes them completely inadequate for dealing with highly emotional beings such as Earth humans.

Furthermore, other races, such as the Urmah cats, insist that they are tricksters and are all except trustworthy because they have had bad experiences with them in the past and because the Eorthans are members of other groups, such as the dubious Orion Council. This council is also officially positive and I don't doubt that there may be levels in them who may be positive indeed, but they are as dubious and not trustworthy as the Eorthans themselves, as they are known to use countless tricks and manipulation strategies to get away with their invasive agendas. Negative agendas that are everywhere, yet they deny they exist.

Who in the higher parts of the Galactic Federation sent the Eorthan detachment and why they chose the Eorthans as their ambassadors remains obscure, and this is a big part of why we strongly disagree with it. The local Galactic Federation representatives, who are on good terms with Queen Alenym, state that they do not know and that they are equally uncomfortable with not knowing and with the situation in general. Yet, they still accept to cooperate in full with the Eorthan detachment.

All right, now this is the present situation, and everything that I'm going to say next has been approved by the Taygetan High Command present here in Earth's orbit. High Command that is represented by Queen Alenym the First herself.

On the 28th of December 2023, the Taygetan supply ship Saska 1 arrived at low Earth orbit and docked side by side with Toleka to unload supplies and two new fighter class starships, which are to replace the older ones which are aging and need to be given a new task, training cadets in Temmer and not here in the front line.

On the morning of the 29th of December, starship Toleka's information processing center, known as CIC, received a notification from the local Galactic Federation based on the Andromedan biosphere ship Viera. The message said that the Eorthan deep Federation detachment had cancelled their arrival, which was scheduled for December 31st, and that they did not know when they would arrive, if they would arrive at all. I was even thinking of publishing a situation update video for all of you saying that the Eorthan detachment's arrival had been cancelled, perhaps even as the result of having been exposed by my group.

But this turned out to be only wishful thinking, as they suddenly arrived as scheduled. Publishing such a report would have been a mistake, as they did arrive when they said they would. But fortunately, my Taygetan team here in CIC counseled me not to, as they suspected it could be some kind of discrediting trap for me. Why the local Galactic Federation sent the notification saying that the Eorthan detachment would not arrive remains a mystery, as well as why it was sent and with what purpose.

Then, the very next day the Eorthan detachment arrived, only hours later, on January 1st 2024, Japan's west coast experienced a large 7.5 magnitude earthquake followed by a small 4-meter-tall tsunami, as well as countless aftershocks, which caused many people to lose their homes and, in some cases, their lives. Although the amount of casualties remains unclear, yet one is too many.

For all of us versed on how the world really works, those of us who know about conspiracy theories, we can see that this looks like and smells like an offering, a Cabal sacrifice to their returning gods, directly for the Eorthans, perhaps. We cannot know this for sure; that is the problem. But knowing how things are and have been, and how the Cabal and the Federation which controls it operates, as well

as their historical context and background, it is easy to conclude that it is an offering.

We all know that weather modification exists, and earthquakes can be artificially caused because such technology has been around at least since the decade of the 1930s, although this mostly remains a conspiracy theory, even despite clear and concise evidence. It is even said that the white hats, whoever they may be, are about to disclose earthquake-making technology. The good side is always about to do something, but I see they never do anything important because they are always postponing everything for the right moment; a moment which will never arrive because there are no right moments. There is only the now and what we can do with it.

The white hats are most probably the positive side of the Cabal, if there is such a thing, because the Cabal works with duality. On one hand, they hurt and destroy, and on the other, they help and build, with it balancing karma as their belief system dictates to them. Yet, the white hats are always about to do something great and never do. Therefore, all I can do is conclude that they are nothing more than more Cabal and they are some sort of controlled opposition to suffocate the existence and the formation of any new real opposition.

Conspiracy theory or conspiracy theorists is a terrible name because it is loaded with meaning none of us agree with. It conveys the message of being crazy, of being a bunch of nutters who believe in total nonsense, as if we didn't have any proof about it all, which we do have.

Furthermore, they have been targeting Japan for years now, although it has gotten worse since they chose to join treaties with governments and alliances which go against Western Cabal control, mainly new treaties with Russia to buy oil from them, therefore basing the Japanese economy on assets that are not under Western Cabal control. Therefore, and apparently, they are being punished because of all that, because Japan has changed sides.

We know they are being punished with earthquake-making technology because we know they do so and have done so against other places, all as an elaborate blackmail strategy to force nations to obey their rules.

And now it looks like they are doing the same to Morocco, as a 5.1 magnitude

earthquake has just struck the Asilah province there. Morocco is also accepting treaties of the kind not so much in the interests of the Western Cabal.

Furthermore, I have been informed that Argentina's new president Milei is scheduled to go to Antarctica this next weekend, and we all know that there is where meetings between Earth government and Galactic Federation representatives take place, as I've explained in other videos.

The Eorthans held their first meeting behind closed doors on the morning of the 1st of January. Although officially the representatives of any star nation who wish to participate were welcome, CIC has informed me that they did not let everyone in except those who were called upon. That is, whenever they wanted to talk to one or another representative of other races, and when they were finished with them, they took them out of the meeting hall before they proceeded with whatever was next.

Months before the Eorthan detachment arrived, Queen Alenym decided that she was not going to attend the meetings at the Viera, mostly because of safety concerns. As we all know, she is not exactly liked by those shadier parts of the Galactic Federation, so her integrity is a concern to us all.

Since months ago, there have been controversy and discussions here in Toлека because we didn't know whether it was a good idea or not to send a Taygetan detachment to those meetings in Queen Alenym's representation. I wanted Alenym to send a detachment to be able to see and know in detail what has been said in those meetings with the Eorthans. I even wanted to go myself if it would be possible, but Queen Alenym and her sister Nai'shara, as well as their counseling CIC team here, denied such a possibility.

Alenym and Nai'shara state that it is not a good idea to send any crew member of this ship to those Eorthan meetings in the Viera, mainly because they use covert, strong but subtle telepathic mind control over whoever is with them. Therefore, going to their meetings is exposing crew members to Eorthan mind control. Queen Alenym states that she has a way to know what is going on in those meetings and whatever can be shared with you all will be published as soon as possible. Therefore, exposing crew members is not necessary.

The Eorthan telepathic mind control abilities open many possibilities and questions because that logically leads us to think which other races would be under their mind

control and how much. Although it is difficult to imagine that such an advanced and also heavily telepathic race such as the Andromedans could be mind-controlled and without them noticing. This higher Galactic Federation and Etorthan audit, or however is best to call it, has just started, and we will know a lot more as the days go by.

For now, we are preparing a public letter to the Federation, a communique of ideas and a statement of our position where we will openly declare what we think about this situation and everything else that is happening on Earth. This letter is being prepared as we speak and I will publish it here as soon as it is ready. I will keep you informed.

For now, thank you for watching my video and for liking and subscribing. I appreciate it a lot and I hope to see you here next time. I want to thank you all for your kind donations. You are a lifechanger for me, as some of us here do depend on Earth and its economy for our resources and sustenance. Be very well.

With much love.

Your friend,

Mari Swaruu
